Ihre Karrierechance als

Simulation Engineer - Donauwoerth (Germania) (m/w/d)

Im Bereich IT & Software Development / Berufserfahrene

ARBEITSORT

- - ()

AUFGABEN

As a simulation system engineer, you will work on modular simulation systems for a given helicopter family:

- Your main task will be the development and integration of real-time simulation models that map the entire helicopter
- In addition, you connect these simulation systems to the test means or simulators and prepare them for the various applications
- You are in constant contact with specialized departments, external partners, suppliers and customers
- Furthermore, you develop simulation systems for flight simulators and are also responsible for integration and testing

QUALIFIKATIONEN

- You have a degree in Software Engineering, Information Technology or equivalent
- You already have experience in developing, integrating and testing software, especially with real-time software in the Linux environment
- In particular you have programming skills with languages like C, C++ or ADA
- Knowledge about helicopter system and architecture as well as an aviation background are a plus
- Fluent English skills complete your profile
