Ihre Karrierechance als

Test Engineer Avionics Software (m/w/d)

Im Bereich IT & Software Development / Berufserfahrene

ARBEITSORT

- 86609 - Donauwörth (Bayern)

AUFGABEN

Perform tests and qualification of the latest software release of various avionic systems. This includes:

- Perform testing of top notch avionics systems and their embedded software
- Assess the suitability of real-flight simulators
- Writing test procedures and associated documentation
- Setup test benches for civilian and military helicopters
- Delivering Test Reports to the customer

QUALIFIKATIONEN

- You have completed a degree in engineering, preferably avionics, electrical engineering or aerospace engineering
- You have already performed tests and you know some test tools and test methods
- You have experience in system integration and you are keen to dive into complex systems
- You are familiar with DOORS software
- You have basic programming skills with languages like C, C++ or MATLAB
- Ideally, you are familiar with Linux and have already worked with it
- You can demonstrate fluency in business or technical English. German or French will be a plus
- You are open, communicative, determined and eager to become a team player
